

PreHCM Portal

Portal for secure data exchange in mobile communications

Digitalization of process coordination of participating companies in telecommunications

Future-oriented use of the PreHCM portal through modular scalability

- KDS Module - Co-User Platform Complex Roof Sites
- WhiteSpot - Coordination Platform for Supply WhiteSpots (Germany)
- Operator Agreements - national and international operator agreements
- broadBAnd - Coordination platform for supplying WhiteSpots on railroad lines (Germany)
- GSM-R - Railway and mobile network operator fault management platform

Our services in portal development for you:

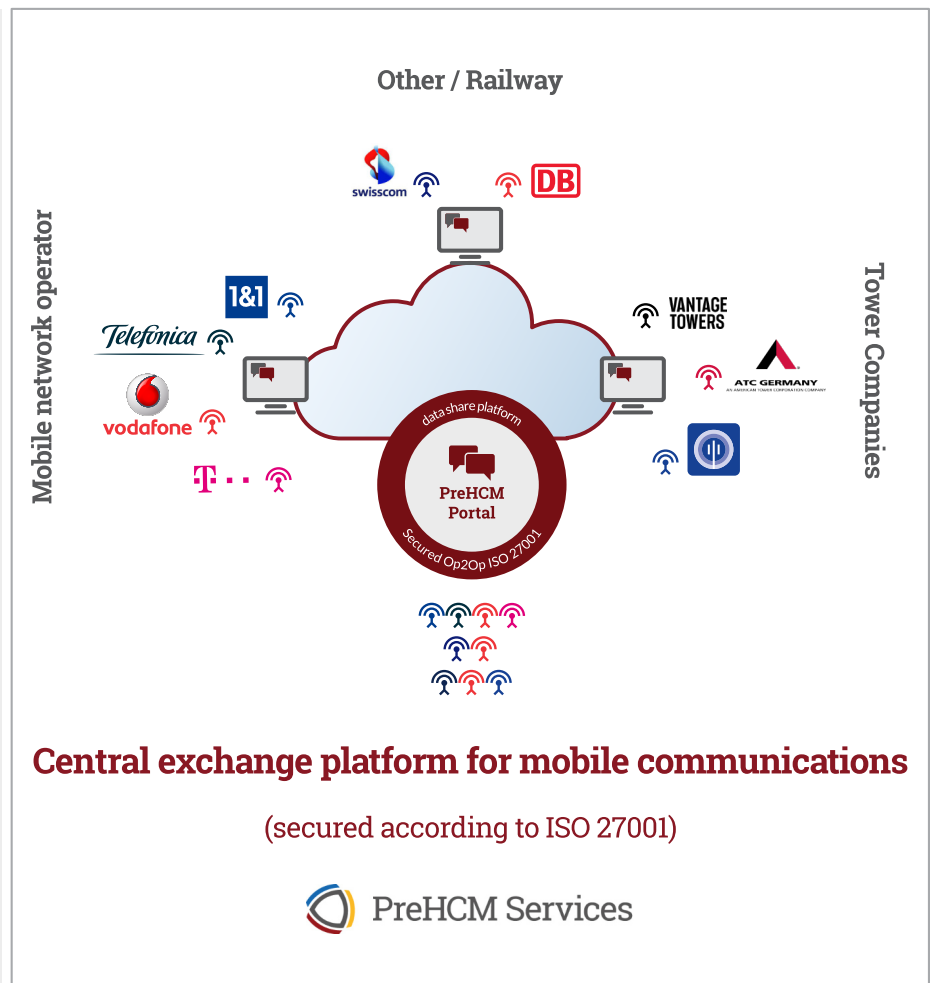

- Process modeling and standardisation with all parties involved
- Process automation, workflow and improvement
- Process integration and connection to the tools of the users (Open API)
- Module development according to modern standards
- Additional services (reporting, monitoring, operation)

Quality gain through automation

Automated interfaces are used to provide neutral reporting and shorten lead times. The process progress (status model) can thus be seamlessly integrated into the planning process of those involved.

State of the Art - Security

Safety requirements coordinated with all users and compliant with their requirements

 Operator Agreements	 WhiteSpot	 KDS	 GSM-R	 broadBAnd
